Section 1.0 – Introduction

Suncor is one of the world’s largest integrated energy companies. As stewards of valuable natural resources, Suncor has the opportunity – and the responsibility – to help build a better future. The goal of creating shared value and benefit for all involved is obtained by supporting resilience, skill development and social well-being in the surrounding communities. Guided by a strategy focused on targeted investments, there is an aim to help communities grow, thrive and become sustainable. The belief that Suncor can be an effective partner in supporting sustainable, resilient communities by leveraging strengths as an integrated energy company is supported by investing in 5 (five) key areas:

- strengthening communities by cultivating community leaders,
- supporting building skills and knowledge for the current and future workforces,
- fostering the ability to think creatively through inspiring innovation,
- building employee and volunteer capability by engaging citizens in community activities, and
- engaging employees and communities in collaborating on our energy future.

Practicing a triple bottom-line approach to sustainability, Suncor is constantly looking for new opportunities to improve environmental performance, while maximizing economic and social benefit. The three criteria are connected. For example, through technology breakthroughs and process improvements, Suncor has opportunity to reduce environmental impact and make a difference to communities, while at the same time contributing to the bottom line through things like higher production or reduced costs. Responsible development has always been fundamental to Suncor. Innovations on the East Coast, such as the Hydrocarbon Blanket Gas and Recovery System, have received nationwide attention and showcase our commitment to developing a sustainable energy future.

The quest to create energy for a better world is the core principle at Suncor. As much as it relates to the business and the products which are produced and sold, creating energy for a better world is also about the people and the spirit that lives at the heart of the company. It’s a deep commitment to making a difference not only in the business, but in the communities, the county and the world.

Section 2.0 – Terra Nova Development

The Terra Nova Oil Field is situated on the Grand Banks, about 350 kilometers east-southeast of St. John's, Newfoundland, and 35 kilometers southeast of the Hibernia Oil Field. The Terra Nova field is comprised of a combination of producing wells, as well as water injection and gas injection wells, and delivers production from the Graben, East Flank and Far East blocks.

Discovered in 1984, the field was the second to be developed off Newfoundland. Production from the field began in 2002, through the use of a Floating, Production, Storage and Offloading (FPSO) vessel. This was the first development in North America to use FPSO technology in a harsh weather environment.

The FPSO is a ship-shaped vessel which has integrated oil storage capability from which oil is offloaded into a shuttle tanker. The storage capacity of the Terra Nova FPSO is 960,000 barrels of oil with accommodations for up to 120 personnel while producing. The vessel is 292.2 meters long, 45.5 meters wide and stands higher than 18 storeys. Terra Nova pre-production capital expenditures were approximately \$2.8 billion. The FPSO arrived in field on August 21, 2001 and produced first oil in January 2002.

Suncor Energy, as operator of Terra Nova, is committed to enhancing opportunities for the people of the province through participation in the Terra Nova Development. A lasting economic legacy is being created for the province through Suncor's recruitment and training of local talent, its provision of full and fair opportunity to local businesses, and by giving first consideration to locally produced goods and services within the Province, where those goods and services are deemed competitive.

The following represents Suncor's Industrial Benefits Public Report for the fourth quarter ending December 31st, 2018. This fourth quarter public report provides a summary of activities related to the production phase of the Terra Nova project carried out by Suncor and its major sub-contractors.

Section 3.0 – Project Activity and Benefits Accomplishments

Suncor achieved a number of milestones during the fourth quarter of 2018. Some of these highlights and achievements include:

- Operational and capital expenditures for the Terra Nova project totaled approximately \$134.7 million, 75% of which was spent in Newfoundland and Labrador (NL) and the other provinces and territories of Canada.
 - 60% was spent in NL
 - 15% was spent in the other provinces and territories of Canada
- A total of 1,140 purchase orders valued at \$22.8 million were issued - 1,056 of which were awarded to vendors with a NL location or another Canadian location. Approximately \$20.9 million (93%) was spent in Canada including NL.
 - \$12.8 million in purchase orders awarded to NL locations (70%), and
 - \$8.1 million in purchase orders awarded to other Canadian locations (23%).
- A total of 1032 people were working on the Terra Nova project at the end of December 31, 2018, of which 96% (1002) were residents of Canada including NL.
 - 908 or approximately 88% were residents of Newfoundland and Labrador
 - 94 or approximately 9% were residents of other Canadian provinces or territories

Section 4.0 – Employment

As of December 31, 2018, a total of 1032 people were working on the Terra Nova development. Of the 1032 total, 908 or approximately 88% were residents of NL, while another 94 or approximately 9% were residents of other regions of Canada at the time of hiring (Table 3.1). Of the Newfoundland and Labrador residents, 382 employees worked onshore, and 526 worked offshore. Of the residents from other Canadian provinces and territories, 35 worked onshore, 56 worked offshore and three residents worked outside of NL (Table 3.2).

Direct Employment (Total Number of Persons)	Newfoundland and Labrador Residents (%)	Other Canadians (OC) (%)	Non-Canadians (NC) (%)
1032	88%	9%	3%

Location	Total Number of Persons					Total
	Residency Status			Gender		
	NL	OC	NC	Male	Female	
Onshore	382	35	14	326	105	431
Offshore	526	56	11	578	15	593
Other	0	3	5	6	2	8
	Total:					1032

Of the 1032 employees supporting the Terra Nova development, 910 were male and 122 were female or approximately 12% of the total workforce (Table 3.3). Table 3.3 also breaks down the employment summary by discipline, which includes management, administration, engineers, technicians, professionals, skilled trades workers, labour workers, students and others that do not fit one of these categories. The most male dominant discipline was skilled trades and the other category at 99% male, while the discipline that is the most female-dominated is administration at 76% female.

Table 3.3 – Employment Summary by Discipline
Terra Nova Project
(Q4, 2018)

Discipline	Number of Persons				Total Number of Persons
	Male	%	Female	%	
Management	98	88%	14	12%	112
Administration	13	24%	42	76%	55
Engineers	65	79%	18	21%	83
Technicians	110	91%	11	9%	121
Professionals	59	74%	21	26%	80
Skilled Trades	259	99%	3	1%	262
Labour	128	93%	9	7%	137
Students	11	84%	2	16%	13
Other	167	99%	2	1%	169
Totals:	910		122		1032

Notes:

- Disciplines are based on the following National Occupational Classification (NOC) Codes:
 - Management** includes: *Senior Managers* as well as *Middle & Other Managers*
 - Administration** includes: *Administrative & Sr. Clerical Personnel* as well as *Clerical Personnel*
 - Engineers** includes: only those in that NOC Code
 - Technicians** includes: *Semi-professionals & Technicians*
 - Professionals** includes: only those in that NOC Code
 - Skilled Trades** includes: *Skilled Crafts & Trades* as well as *Skilled Trades & Service*
 - Labour** includes: *Semi-Skilled Manual Workers, Other Manual Workers* as well as *Intermediate Sales & Service*
- Students** includes: any student enrolled at a recognized educational institution or accredited academic program and includes both graduate and undergraduate students, cadets or any other student.
- Other** includes: marine crew and positions that do not fit into any of the other disciplines.

Section 5.0 – Canadian-Newfoundland and Labrador Content

The following table is intended to reflect the benefit distribution from Terra Nova cash expenditures.

Table 4.1 summarizes the content distribution of operating and capital cash expenditures for the period, by Newfoundland and Labrador, other Canadian, and non-Canadian spending.

Table 4.1 – Canadian-Newfoundland and Labrador Content Terra Nova Project - Operating and Capital Cash Expenditures (Q4, 2018)			
Reporting Period	Content		
	Newfoundland and Labrador (%)	Other Canadian (%)	Non-Canadian (%)
This Quarter:	60%	15%	25%
Year to Date (YTD):	58%	15%	27%
Project Cumulative(since production started in 2002):	56%	16%	28%

The expenditure content percentages for the fourth quarter ending December 31, 2018 were 60%, 15% and 25% for Newfoundland and Labrador, other Canadian, and non-Canadian spending, respectively.

Section 6.0 – Contracting and Procurement

Two (2) new contracts were executed during the period October 01, 2018 to December 31, 2018.

Table 5.1 – New Contracting Activity Terra Nova Project (Q4, 2018)		
Description	Contractor	Contractor Location (NL, Other Canadian, Non-Canadian)
Supply of Hand Tools	Rideout Tool & Machine Inc.	NL
Courier Services	Crosstown	NL

A total of 1,140 purchase orders with a cumulative value of approximately \$22.8 million were awarded during the fourth quarter of 2018. Approximately \$20.9 million, (93%) was spent in Canada including NL. Figure 5.1 summarizes the distribution of spend associated with all purchase orders across locations.

Figure 5.1 - Purchase Orders (Percentage of Participation on a Value Basis)

Section 7.0 – Conclusion

Suncor Energy is committed to enhancing local industrial benefits for the people and the province of Newfoundland and Labrador for the life of the Terra Nova development to create a lasting legacy from the province's first FPSO development.
