

Subject: Warning Siren Tests at Low Volume at the Suncor Sulfur Plant

Date : 25 octobre 2016

We wish to inform you that on October 25, at 11:00 AM, the Suncor Montreal Sulphur Plant will conduct a test of its warning siren. This test will be at a low volume and it will last 15 seconds.

The siren will emit a modulated sound that could be heard on the outskirts of the sulfur plant site. The government and local authorities have been warned.

Thank you for your understanding.

For further information, you may contact our Environment, Health and Safety group at 514-645-1636.
