

Burrard Terminal Traffic and Noise Advisory

The Suncor Burrard Products Terminal is situated on 430 acres of land of which 175 acres are used for terminal operations.

- The Upper Terminal, located in Port Moody, contains the fuel processing units, main tank farm and the fuel blending facilities.
- The Middle Terminal is located on the south side of the Barnet Highway in Burnaby. It contains the secondary tank farm and truck facilities.
- The Lower Terminal is located in Burnaby, Port Moody and along the Burrard Inlet. It contains the marine and rail facilities.

Gasoline, diesel, ethanol, and bio-diesel arrive at the terminal via pipeline, marine tankers, trucks and rail.

Construction activities on site

Beginning November 8, 2021, we will be conducting work at the Burrard terminal to replace our current flare stack.

This work will include extra equipment being mobilized to site including trucks and cranes, as well as the movement of gravel. This will cause additional noise and traffic in the area however, all work will be done within the guidelines and requirements of current noise bylaws.

At Suncor, we value the relationship we have with our neighbours. To minimize disturbances, we will be using the south access gate off Glenayre Drive for any equipment.

We expect this work to be completed and demobilized by the end of December.

We apologize for any inconvenience this may cause and thank you for your patience.
