RE: Suncor's Forty Mile Solar Power Project

Dear community member:

Forty Mile Granlea Wind GP Inc., a wholly-owned subsidiary of Suncor Energy Inc. (Suncor), is excited to begin the planning phase for the Forty Mile Solar Power Project located in the County of Forty Mile. The solar project is an expansion of the approved Forty Mile Wind Power Project, which is scheduled for construction restart in April 2021.

You are receiving this information because you may be interested in the proposed project and we are seeking feedback on the preliminary plans. In this information package, you will find an overview of the project, a map of the proposed project site, a brochure from the Alberta Utilities Commission titled *Participating in the AUC's independent review process* and our contact information.

The project is planned to be located entirely on privately owned land and will have a maximum output capacity of 220 megawatts connected to the Alberta Interconnected Electric System. The technical components of the project include solar modules, power inverters, an electrical collection system, access roads, temporary construction facilities, fencing around the project perimeter and an expansion of a substation.

In late 2020, Suncor engaged landowners in the Forty Mile area for land optioning purposes. In 2021, we will complete studies and consult with you to learn about your interests and possible concerns. To ensure your questions and interests are addressed, we plan to maintain regular communications and hold community forums in a format that meets your information needs while keeping everyone safe during the COVID-19 pandemic.

Thank you for taking the time to review this information. If you have questions or concerns, please contact us at fortymile@suncor.com or at 1-866-344-0178 (extension 2).

Yours truly,

Forty Mile Granlea Wind GP Inc.
On behalf of Forty Mile Granlea Wind Limited Partnership
