

Subject: Equipment Maintenance - Fall 2020

Please note that we are proceeding with planned shutdowns of equipment for annual maintenance work that we will start on September 19, 2020, and that will last for a period of about six weeks. During this period, the flare will be used as needed.

These activities are part of our plant's regular annual maintenance and repair program, designed to ensure the safe, efficient functioning of our equipment. This work is part of our regular annual refinery maintenance and repair plan to ensure the safe and efficient operation of our equipment.

During this period, the flare will be used intermittently. Nearby residents may notice noise associated with its use. The flare is an industrial facility that safely burns excess hydrocarbons in a controlled manner.

In keeping with our commitment to the community, the work will be carried out in such a way as to minimize any nuisances and the impacts they may have.

Thank you for your understanding.

For further information, you may contact the refinery at any time at 514-640-8000.

Important note:

All our notices to the community are posted on the website of the Association Industrielle de l'Est de Montréal (AIEM). You may register on the AIEM website at www.aiem.qc.ca if you want to automatically receive the email notifications from the member industries.

"This notice stems from our social commitment as a member of the AIEM, and its aim is to inform members of the neighbouring community about any incidents likely to have an impact outside our site."
