ENVIRONMENT POLICY
Montreal Refinery

The ISO 14001 Environmental Management System (EMS) applies to manufacturing, storage, pumping and shipping activities for petroleum products and petrochemicals as well as to activities for the management of contaminated soil and hazardous substances that are the responsibility of the appointed and acting vice-president.

The Montreal Suncor refinery is committed to:

- Complying with regulations
- Protecting the environment
- Preventing pollution
- Enforcing the notion of continuous improvement
- Maintaining good relations with stakeholders

**REQUIREMENTS**

The following requirements serve as a benchmark for the development of environmental objectives:

- Applying processes, procedures and work methods that ensure compliance with legislation
- Mitigating environmental impacts
- Maintaining the Operational Excellence Management System (OEMS)
- Reducing operational risks
- Reducing operational risks

All employees are partners when it comes to environmental protection. They play an important role and bear a great responsibility in meeting these commitments.

Confirmed by Caroline Montplaisir and the refinery’s officers on February 7, 2019
