

Subject: Planned equipment maintenance

Date: March 27 2017

The Suncor Montreal Sulphur Plant will be conducting planned equipment maintenance over the next few months.

These activities are part of our plant's regular annual maintenance and repair plan to ensure the continued safe and efficient operation of our equipment.

During the first few days of the planned maintenance, there may be more visible smoke than usual from one of our chimney stacks.

The work will begin on March 28th and will continue for approximately two months.

The work will be carried out in accordance with our commitment to the community and in such a way as to reduce nuisances and their impacts.

We apologize for any inconvenience this work may cause and thank you for your patience.

For further information, you may contact:

Matthew Sills
Manager, EH&S-Sulphur plant
