

Suncor Energy Foundation 2023

The [Suncor Energy Foundation](#) (SEF) is a private, charitable foundation established by Suncor in 1998. Through partnerships and relationships with those who are courageously seeking solutions, we help spark change and propel progress for generations ahead. Since its inception more than \$284 million has been contributed by SEF to charitable organizations across Canada.

In 2023, SEF donated **\$24M** to community

SEF combines community and Suncor strengths to find social, economic and environmental solutions to complex challenges. To bring this work to life, SEF focuses on three interconnected pillars:

Community presence

We invest in communities where our employees work and live, through donations and sponsorships to local community organizations. We also support employee investments in causes that matter to them through the SunCares program.

Funding priorities

Through our donation partnerships, we are learning from and with **Indigenous Peoples** and others to strengthen **community** while the world is going through an **energy** transition.

Social innovation capacity

We contribute to the development of the social innovation sector and use social innovation practices to develop our own programs. We define social innovation as any initiative, product, program or design that challenges or changes society's actions and beliefs. Successful social innovations create long-term transformative impact.

In 2023, SEF contributed **\$2.4 million** through the SunCares program.

Funding priorities

In 2023, SEF donated more than **\$19.8 million** to community through its funding priorities pillar.
