## Section 1.0 – Introduction

The Terra Nova Oil Field is situated on the Grand Banks, about 350 kilometers east-southeast of St. John's, Newfoundland, and 35 kilometers southeast of the Hibernia Oil Field. The Terra Nova field is comprised of a combination of producing wells, as well as water injection and gas injection wells, and delivers production from the Graben, East Flank and Far East blocks.

Discovered in 1984, the field was the second to be developed off Newfoundland. Production from the field began in 2002, through the use of a Floating, Production, Storage and Offloading (FPSO) vessel. This was the first development in North America to use FPSO technology in a harsh weather environment.

The FPSO is a ship-shaped vessel which has integrated oil storage capability from which oil is offloaded into a shuttle tanker. The storage capacity of the Terra Nova FPSO is 960,000 barrels of oil with accommodations for up to 120 personnel while producing. The vessel is 292.2 meters long, 45.5 meters wide and stands higher than 18 storeys. Terra Nova pre-production capital expenditures were approximately \$2.8 billion. The FPSO arrived in field on August 21, 2001 and produced first oil in January 2002.

Suncor Energy, as operator of Terra Nova, is committed to enhancing opportunities for the people of the province through participation in the Terra Nova Development. A lasting economic legacy is being created for the province through Suncor's recruitment and training of local talent, its provision of full and fair opportunity to local businesses, and by giving first consideration to locally produced goods and services within the Province, where those goods and services are deemed competitive.

The following represents Suncor's Industrial Benefits Public Report for the quarter ending September 30, 2014. This third quarter public report provides a summary of activities related to the production phase of the Terra Nova project carried out by Suncor and its major sub-contractors.

## Section 2.0 – Project Activity and Benefits Accomplishments

Suncor achieved a number of milestones during the third quarter of 2014. Some of these highlights and achievements include:

- Operational and capital expenditures for the Terra Nova project totaled approximately \$220 million, 65% of which was spent in Newfoundland and Labrador (NL) and the other provinces and territories of Canada.
  - 51% was spent in NL
  - 14% was spent in the other provinces and territories of Canada
- A total of 1,354 purchase orders valued at \$15.9 million were issued, 1,255 of which were awarded to vendors with a NL location or another Canadian location. Approximately \$13.8 million (87%) was spent in Canada including NL.
  - \$10.6 million in purchase orders awarded to NL locations (67%), and
  - \$3.2 million in purchase orders awarded to other Canadian locations (20%).
- A total of 1,315 people were working on the Terra Nova project at the end of September 30, 2014, of which 95% (1,250) were residents of Canada including NL.
  - 1,147 or approximately 87% were residents of Newfoundland and Labrador
  - 103 or approximately 8% were residents of other Canadian provinces or territories

## Section 3.0 – Employment

As of September 30, 2014, a total of 1,315 people were working on the Terra Nova development. Of the 1,315 total, 1,147 or approximately 87% were residents of NL, while another 103 or approximately 8% were residents of other regions of Canada at the time of hiring (Table 3.1). Of the Newfoundland and Labrador residents, 586 employees worked onshore, and 556 worked offshore. Of the residents from other Canadian provinces and territories, 38 worked onshore, 62 worked offshore and 3 worked outside of NL (Table 3.2).
